

JAE INTRODUCES SIM/ microSD™ 2 in 1 ST5 CONNECTOR.

IRVINE, CA. November 23, 2007--Japan Aviation Electronics (JAE) has developed a low-profile, SIM/ microSD™ 2 in 1 ST5 to meet the connector needs of high end mobile devices such as smart phone and multifunctional handy terminal. The ST5 connector with are two-in -one design for microSD™ card and GSM11.11 standard compatible Plug in SIM card.

The ST5 offers a very low profile 2 in 1 combination design with 2.8mm height and a push-push insertion/eject method, which also features a breaking mechanism to prevent the microSD™ card from flying out. There is an audible click when the microSD™ card is fully engaged and the structure prevents reversed card insertion.

It is also still compatible with standard GSM11.11 SIM cards and microSD™, standardized by SDA™ .

ST5 Series connector is priced at \$2.95 each in quantities of 800 pieces.

Delivery is 8 - 10 weeks. For additional information on the ST5 connectors and the complete line of JAE connector products, please visit JAE's comprehensive connector search engine at www.jae-connector.com, or contact JAE Electronics, Inc., 142 Technology Drive, Building 100, Irvine, CA 92618-2430, Telephone 800-523-7278, 949-753-2600, FAX 949-753-2699, e-mail: jae@jae.com.
