<<Outline>>

The DW1 Series is a rack and panel connector with 2 contacts for high-current (500A). It enables the connection of the 2 contacts for power supply and 20 contacts for signal at once. The DW1 Series is suitable for use in a wide range of applications such as storage battery systems, power supply systems, UPS, and other power supply control equipments. The DW1 Series is a UL recognized product.

Features

- UL Recognized Product: File No.E67741 
- High-current: compatible with 500A
- Electrical Shock Prevention: protection cap for plug side
- Floating Amount: $\pm 2.75\text{mm}$
- Robust housing integrating complex power supply and signal area.
- Signal connector can be attached to the main unit using an exclusive jig.
- Signal area has a 2-point contacting structure contact.
- Power supply compatible with bus bar and cable connection.

General Specifications

- No. of Contacts:
 - 2 pos. (power supply)
 - 20 pos. (signal)
- Rated Current:
 - 500A (power supply)
 - 2A (signal)
- Rated Voltage:
 - 600V (power supply) *Note 1
 - 100V (signal)
- Contact Resistance (power supply):
 - 0.2mΩ max. (initial)
- Durability: 20 times
- Operating Temperature:
 - 40Deg. C~+95Deg. C

Note 1: Please contact us when considering use in usage environments that exceed 600V.

Notice:

1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.

2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.

3. The products presented in this brochure are designed for the uses recommended below. We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

(1) Applications that require consultation:

(i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:

Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.

(ii) We may separately give you our support with a quality assurance program that you specify, when you think of a use such as :

Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc.
