CAT.NO.COAX-007A-E.FEB.2008

COAXIAL
CONNECTORS

Japan Aviation Electronics Industry, Ltd.

ADAPTERS

Adapter for pin/socket conversion of the same series or connection between connectors of different series.

Applicable to various series. A wide variety of types are available : Straight, right-angle, panel mount and bulkhead.

Enables different types of connections for various applications.

★For Materials, finishes and specifications, please consult us.

■Description of the shape of the mating part

“Receptacle” and “Plug” described in page 94 to 107 for mating part configuration refers to below.

- Receptacle : receptacle or jack (female side)
- Plug : plug or plug receptacle (male side)

Before placing an order

- ①The values specified in this catalogue are only for reference. The products and specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.
- ②Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.
- ③The products presented in this catalogue are designed for the uses recommended below.
We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

(1)Applications that require consultation: _____

- (i)Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:
Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.
- (ii)We may separately give you our support with a quality assurance program that you specify, when you think of a use such as:
Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2)Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc.
