

JA-5H200 accelerometer

Key features

- 200 °C operating temperature
- High accuracy with long term stability
- Shock and vibration resistant
- Ultimate reliability
- Easy to integrate

The 200 °C JA-5H200 accelerometers have been developed to meet the increasing high temperature needs of downhole applications. As one of the key suppliers of accelerometers to downhole applications JAE has used its wealth of knowledge to extend the working temperature of the accelerometer to provide reliable long term operation even at extreme temperatures without compromising performance.

Applications

Designed for extreme downhole applications including:

- Directional Drilling
- MWD/LWD
- Wireline

These high performance servo balanced quartz accelerometers have been specifically designed to survive the environmental challenges of downhole applications including Directional Drilling, MWD/LWD and Wireline. The proven rugged design provides reliable long term operation even at 200 °C.

An extreme product for extreme applications.

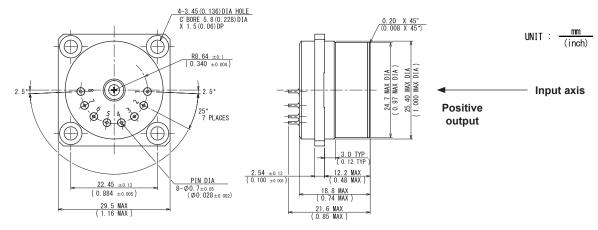

Accelerometers must only be exported in accordance with all relevant regulations.
